SUMMARY

Aspiring Cybersecurity Professional with hands-on experience in Security Monitoring, Log Analysis, and SIEM technologies. Skilled in Python, Linux, Networking Fundamentals, and Threat Detection. Experienced in building practical cybersecurity projects including a Security Log Analyzer and a Home SOC Lab using Wazuh. Passionate about continuous learning and developing skills in security operations and incident response.

EDUCATION

BSc (Hons) in Information Technology, Specializing in Cyber Security 2024 – Present
Sri Lanka Institute of Information Technology (SLIIT), Malabe

President Girls' College Kurunegala 2010 – 2023
GCE A/L - Arts Stream

SKILLS

- **Cybersecurity:** Security Monitoring, Log analysis, SIEM, Threat Detection,
- **Security Tools:** Wazuh, Wireshark, Nmap, Cisco Packet Tracer, VirtualBox
- **Programming:** Python, Java
- **Operating Systems:** Linux(Ubuntu) , windows
- **Networking:** TCP/IP, DNS, HTTP/HTTPS, Network Troubleshooting ,Subnetting
- **Version Control:** Git, Github
- **Soft Skills:** Analytical Thinking, Problem Solving, Communication, Attention to Detail, Teamwork

CERTIFICATES

Introduction to Cybersecurity – Cisco Networking Academy 🔗 — Issued: June 2026 | Credential ID: 628614d7-9ab1-4846-865d-6e5318e89e48 | Successfully completed the Introduction to Cybersecurity course offered by Cisco Networking Academy. Gained foundational knowledge in cybersecurity concepts, information security, cyber threats, and security best practices.

Getting Started with Cisco Packet Tracer – Cisco Networking Academy 🔗 — Issued: June 2026 | Credential ID: 22c48186-b2fa-49db-8ad2-c900feadeede | Successfully completed the Getting Started with Cisco Packet Tracer course offered by Cisco Networking Academy. Developed practical skills in network simulation, device configuration, troubleshooting, and understanding fundamental networking concepts.

PROJECTS

Home SOC Lab with Wazuh | Wazuh, Ubuntu, Kali Linux, Wireshark 🔗

- Designed and implemented a Home Security Operations Center (SOC) lab environment for security monitoring and threat detection
- Configured Wazuh SIEM to collect and analyze security events from multiple sources.
- Utilized Wireshark to inspect network traffic and investigate suspicious activities.
- Enhanced practical knowledge in security monitoring, incident detection, and log analysis.

Security Log Analyzer | Python, Regex, Log Analysis 🔗

- Developed a Python-based application to analyze security logs and identify suspicious events.
- Implemented pattern matching techniques to detect anomalies and potential security threats.
- Automated report generation to improve the efficiency of security investigations.
- Strengthened skills in log analysis, threat detection, and cybersecurity automation.

Network Traffic Analyzer | Python, Scapy, Pandas, Matplotlib

- Built a network traffic monitoring tool to capture and analyze packets in real time.
- Identified unusual network behavior through traffic analysis and visualization techniques.
- Generated analytical insights to support cybersecurity investigations and network monitoring activities.
- Improved proficiency in packet analysis and network security concepts.

eParkZone – Online Parking Management Platform | HTML, CSS, JavaScript, PHP, MySQL

- Developed a web-based parking management system to streamline parking reservations and user management.
- Implemented features for booking management, secure user interactions, and operational efficiency.
- Collaborated on system development while applying problem-solving and software development practices.
- Strengthened full-stack development and database management skills.
